TERMS OF SERVICE

Estimates: Auckland Hydrographics will send you an estimate via Email or telephone. Please note that an estimate is based on the approximate amount of time and material to complete a job. If an Item being dipped has unusual size or shape the estimate can vary. Also, if a special order film pattern is chosen, the estimate may fluctuate due to shipping costs of film. We will communicate any of these issues to you before we complete any work on your item.

Turnaround time: Average turnaround time is approximately 10-14 days. Depending on other jobs already started we may not get onto your job the day it arrives. Hydrographics is a multi-stage process. Drying times effect the turnaround time. Your item/s will need to be prepped, primed, base coated, dipped and clear coated. Please note that 14 days does not include shipping time to or from our location. If you need your item expedited, please contact us for an additional estimate.

Guns/Bows: All firearms and bows must be disassembled and cleaned before shipment to our facility. Non disassembled or cleaned items will incur additional charges.

Payments: Full payment is required on completion prior to return shipping. Special order prints require 50% in advance to secure order of film. We accept cash and bank deposits.

Warranty Program: We will warrant all work for 6 months. This covers any failure or peeling of clear coat, basecoat, etc. This does NOT cover any damage due to improper care or negligence on the customer's part, however should an unfortunate circumstance occur, please contact us for possible goodwill assistance. If you are unhappy for ANY reason with an item that was dipped please contact us on 021 029 58432 or send an email to aucklandhydro@gmail.com and we will work with you to make sure you are satisfied.
